

PRODUCT DESCRIPTION

KENNOL FOF-37°C is a coolant especially formulated and developed for FORD-OPEL-FIAT light vehicles and commercial vehicles. Bittered inhibited Mono Ethylene Glycol based product with organic molecules according to Ford WSS M97B44-D specifications.

Ready to use for cooling cast iron and aluminum.

It protects against overheating in summer and freezing in winter.

PROPERTIES

KENNOL FOF-37°C is formulated from bases and additives next generation to provide with features, such as:

FEATURES	BENEFITS
High performance bases and Additives	It insures an optimal long-term protection against overheating and freezing, against corrosion (for all motor metals, including aluminum and ferrous alloys).
Organic technology	Offers better performances with regards to classic technology (mineral): - Stability - Resistance to temperature and ageing - Anticorrosive power
Ready to use	Can be used in addition or as a complete renewal of the circuit for a better efficiency.
Compatible with all other coolants. Nitrites, silicates, amins, borates, phosphates exempted.	

SPECIFICATIONS

KENNOL FOF-37°C has been developed to meet the highest international standards, including:

FORD	WSS M97B44-D
OPEL	B 040 1065
FIAT	9.55523
Features	
Colour	Orange
Boiling point (°C)	110
Freezing point (°C)	-37
Density @ 20°C	1,08
pH	8,5

KENNOL FOF-37°C has been developed to bring a solution to drivers concerned about their vehicle performance and endurance. Because this product was born on the track.
